SPEAKERS

Wolfgang Ofner

Programming with Wolfgang,
Senior Cloud Architect

Set It and Forget It: Secure & Automated Certificate Management on AKS

THE H@CK SUMMIT

05.11 Online

06.11 PGE Narodowy, Warszawa

Agenda

Cert-Manager

Let’s Encrypt

Domain Ownership Validation

Demo

Wolfgang Ofner

Freelance Cloud Architect, Toronto, Canada

Focus on Azure, Kubernetes, and DevOps

Microsoft MVP Most Valuable Professional

Microsoft CERTIFIED CYBERSECURITY ARCHITECT EXPERT

Microsoft CERTIFIED AZURE SOLUTIONS ARCHITECT EXPERT

Microsoft CERTIFIED DEVOPS ENGINEER EXPERT

Microsoft CERTIFIED TRAINER MCT

Cert-Manager

Cert-Manager

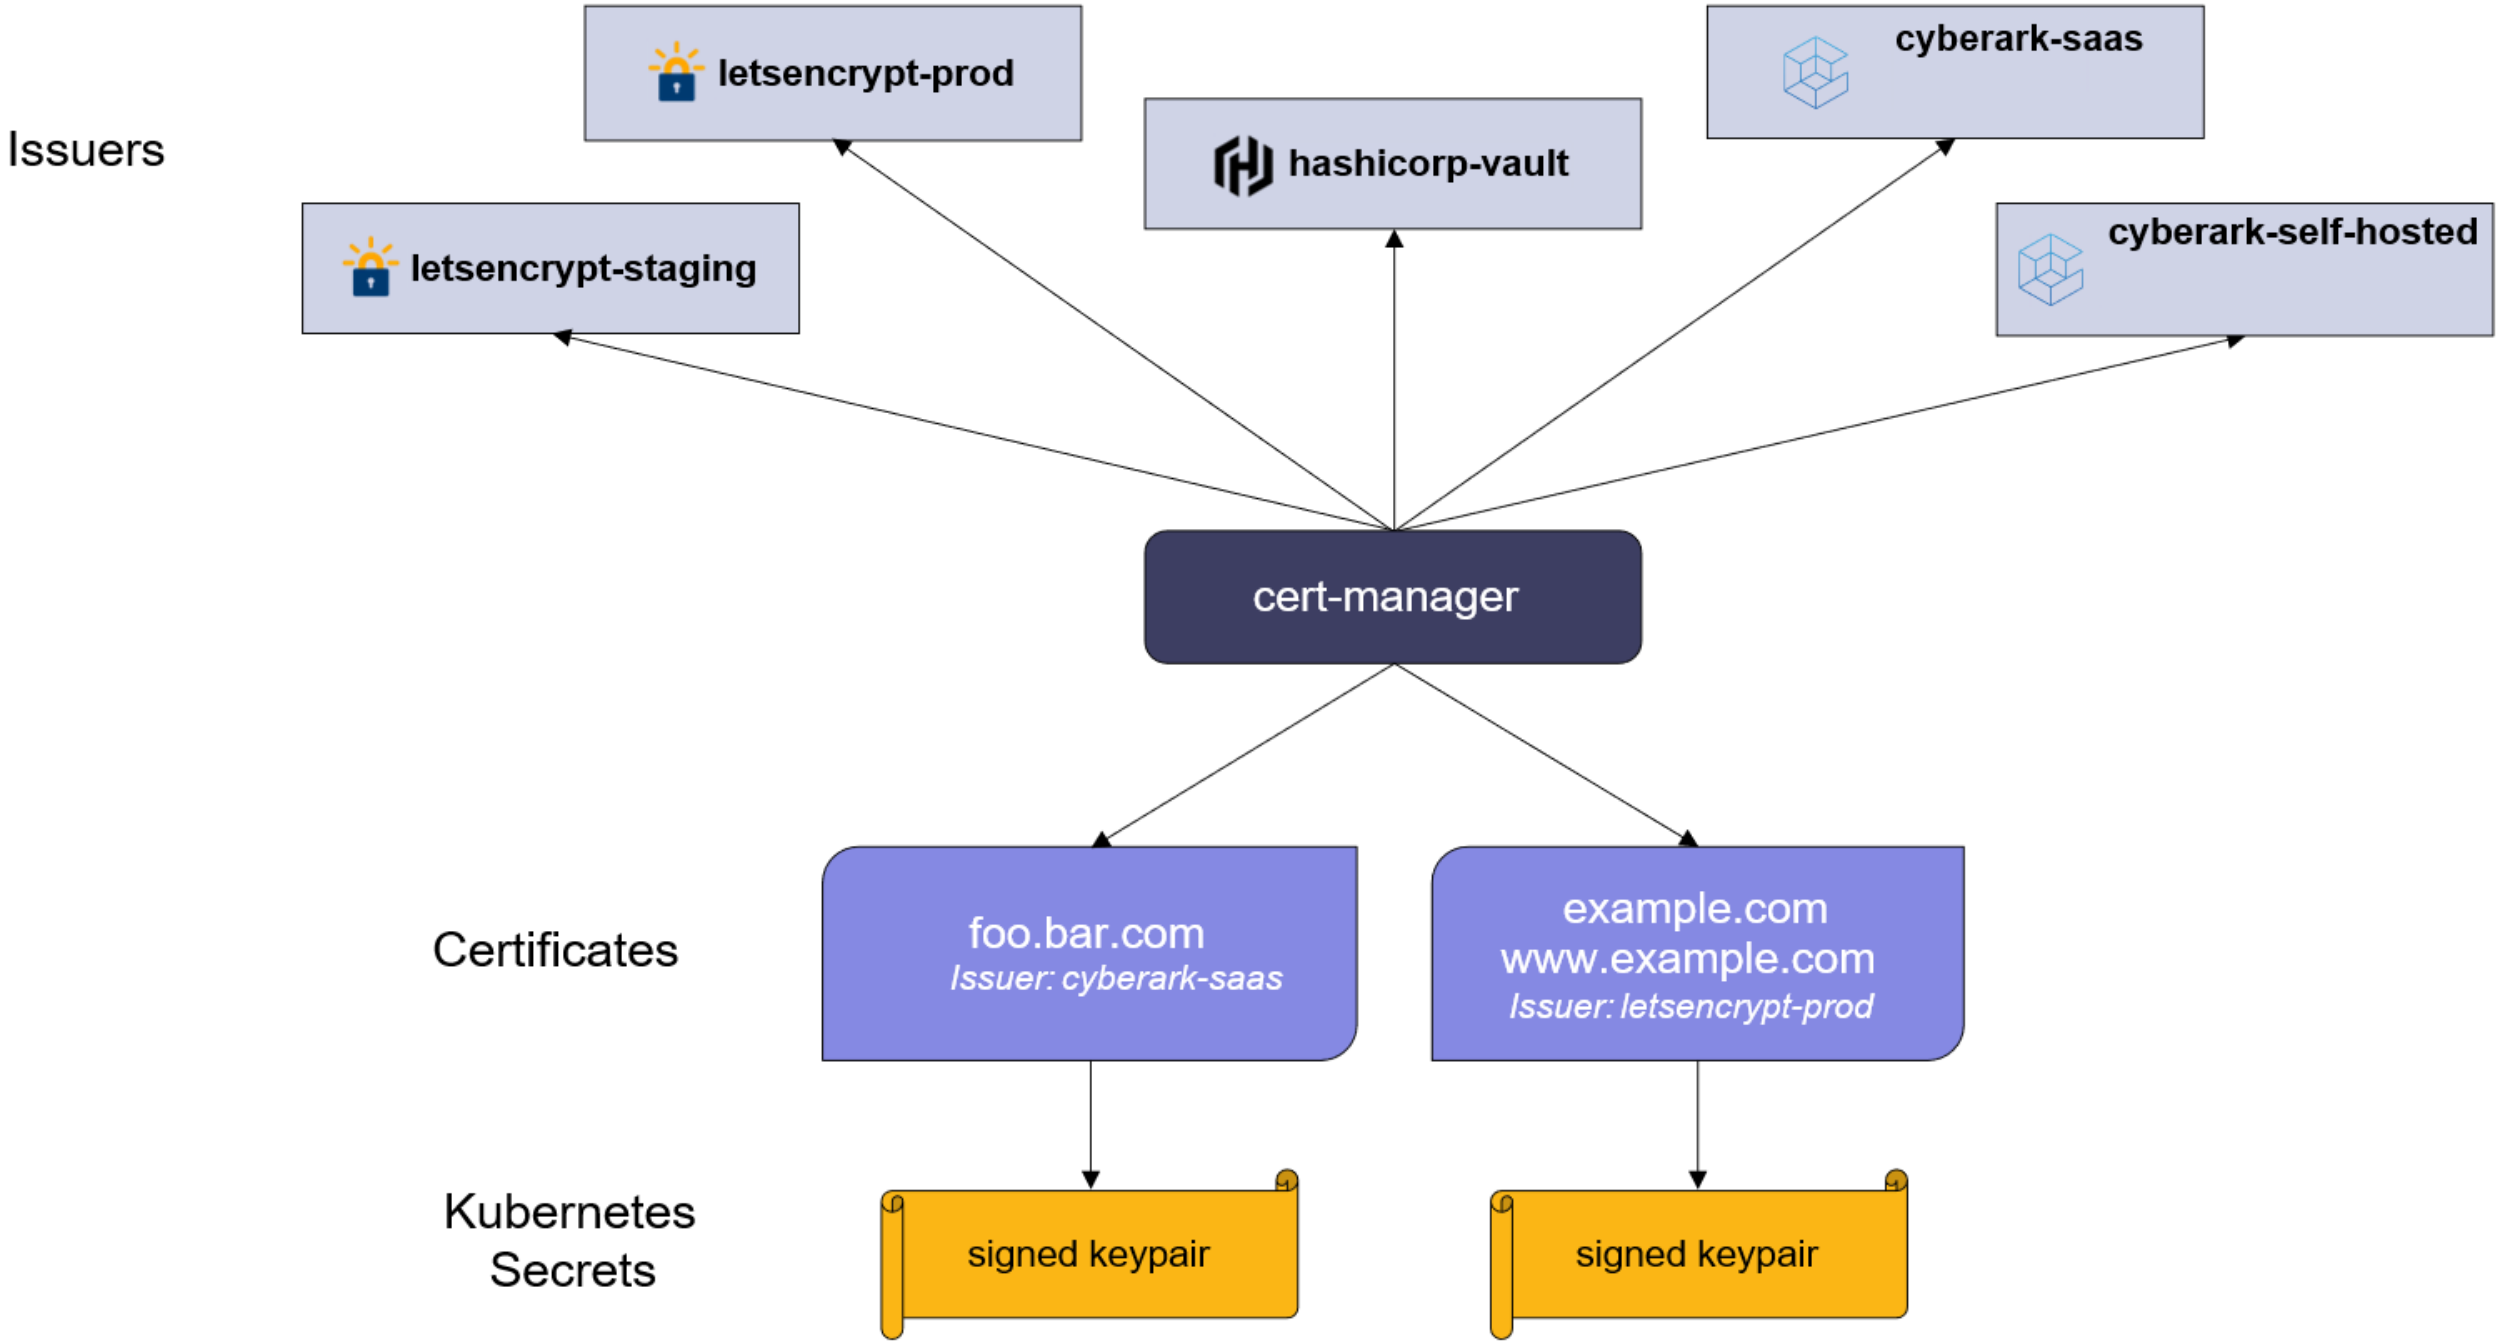

Automatically creates/updates certificates

Uses Issuer to get certificates

Supports Ingress and Gateway API

Verifies ownership of Domain

Issuers
letsencrypt-prod
hashicorp-vault
cyberark-saas
letsencrypt-staging
cyberark-self-hosted
cert-manager
Certificates
foo.bar.com
Issuer: cyberark-saas
example.com
www.example.com
Issuer: letsencrypt-prod
Kubernetes Secrets
signed keypair
signed keypair

Let’s Encrypt

Let’s Encrypt

Nonprofit to create a more secure internet

Free certificates, valid for 90 days

Staging and Production environment

Prod certificates are fully valid in modern browsers

Domain Ownership Validation

Domain Ownership Validation

HTTP-01 challenge

```
solvers:
  - http01:
      gatewayHTTPRoute:
        parentRefs:
          - name: $GatewayName
            namespace: $GatewayNamespace
            kind: Gateway

solvers:
- http01:
    ingress:
      class: nginx
```

```
solvers:
  - http01:
      gatewayHTTPRoute:
        parentRefs:
          - name: $GatewayName
            namespace: $GatewayNamespace
            kind: Gateway
```

```
solvers:
- http01:
    ingress:
      class: nginx
```

```
solvers:
  - http01:
      gatewayHTTPRoute:
        parentRefs:
          - name: $GatewayName
            namespace: $GatewayNamespace
            kind: Gateway

solvers:
- http01:
    ingress:
      class: nginx
```

```
solvers:
  - http01:
      gatewayHTTPRoute:
        parentRefs:
          - name: $GatewayName
            namespace: $GatewayNamespace
            kind: Gateway
```

```
solvers:
- http01:
    ingress:
      class: nginx
```

Domain Ownership Validation

HTTP-01 challenge

Proof ownership of a domain with a file

http://<YOUR_DOMAIN>/.well-known/acme-challenge/<TOKEN>

Cannot be used for wildcard certificates

Domain Ownership Validation

DNS-01 challenge

```
- dns01:
    azureDNS:
      hostedZoneName: $DnsZoneName
      resourceGroupName: $DnsResourceGroup
      subscriptionID: $DnsSubscriptionId
      environment: AzurePublicCloud
      managedIdentity:
        clientID: $CertManagerManagedIdentityClientId
```

Domain Ownership Validation

DNS-01 challenge

Proof ownership of a domain with DNS record

_acme-challenge.<YOUR_DOMAIN>

Challenge can be delegated to another DNS zone

Demo

Demo

Deploy new AKS cluster

Use Envoy Gateway API

Deploy Cert-Manager

Create ClusterIssuer with HTTP-01 Challenge

Deploy Demo app to test HTTPs connection

Demo

Create and configure Managed Identity for DNS access

Update Cert-Manager to use Entra Workload ID

DNS-01 Challenge

Test wildcard certificate
